# WEEKLY REPORT

## **Work done in last week:**

| 26/02/2024 | 1) **Table Design:** Initiate the design process for the table within the "Book Events" section, considering usability and layout for displaying booked events. <br><br> 2) **Dropdown Menu for Location Selection:** Design the dropdown menu for selecting event locations, ensuring it dynamically fetches location options from the database or predefined list. |
|---|---|
| 27/02/2024 | 3) **Field Design - No.:** Design the field for displaying a unique identifier for each booked event, ensuring it facilitates easy reference and identification. |
| 28/02/2024 | 4) **Field Design - Name:** Design the field for displaying the name of the user who booked the event, ensuring it accommodates varying name lengths and formats. <br><br> 5) **Backend Development - Location Data:** Start developing backend functionality for fetching location data based on user selection, ensuring efficient retrieval and response handling. |
| 29/02/2024 | 6) **Field Design - Email:** Proceed with designing the field for displaying the email of the user who booked the event, incorporating input validation and formatting options. <br><br> 7) **Field Design - Gender:** Design the field for displaying the gender of the user who booked the event, providing options for selection or input as required. |
