WEEKLY REPORT

Work done in last week:

19/12/2023	1) An orientation meeting where the employer of Deft Informatics in Ahmedabad presents their company overview was held on the first day of the internship. Introduction of the company's history, mission, and values. 2) Discuss the company culture and expectations for behavior in the workplace. 3) Technology Stack Introduction used at the office in various domains.
20/12/2023	1) As per my internship domain in web development they have made a group with one mentor (external guide) 2) The external guide introduced various major projects that are currently underway, along with their respective use cases and market values. 3) External guide (Astha) assigned some prerequisite training tasks to my group that include some recall of React JS Rendering Elements , React Routes , Problem solving concepts for better understanding.
21/12/2023	1) To kickstart our learning journey, I have begun watching tutorials covering key aspects of our job responsibilities and future learning. 2) These tutorials provide practical insights with valuable knowledge. 3) Clarify doubts with mentor regarding technology stack.
22/12/2023	1) Advancing in our learning, I was exploring the fundamental aspects of React. 2) Understanding and comparing various backend – Frontend technologies for better implementation and how to integrate various database. Xampp , MySQL etc 3) After reviewing documentation, I have completed setup tasks for Frontend frameworks.

Student Id: 20IT141
Student Name: MOHAMMADSAFIK SHAIKH

Project ID:
Project Title: Event Management
(Initially the project was not assigned to me in the first week)

Reason for incomplete work:

There is No Incomplete work left for this Week.

Plans for next week:

Next week's plan involves designing the Header and Footer page with Home page . also we will do responsive design . and also create frontend for Client Sign in , Create User and Sign in button. Also configure the end-point for Header Menu.
